Management lessons from Munna bhai

Try to identify management lesson from this clip!!!

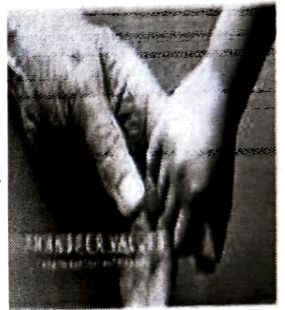

Treating people

- We treat human beings as machines.
- Dealing with "PEOPLE" is the most difficult job.
- Dealing with people is like dealing with a machine. You can't force them the way you want, but you have to make them work.
- I will pay more for the ability to deal with people than for any other ability under the sun.

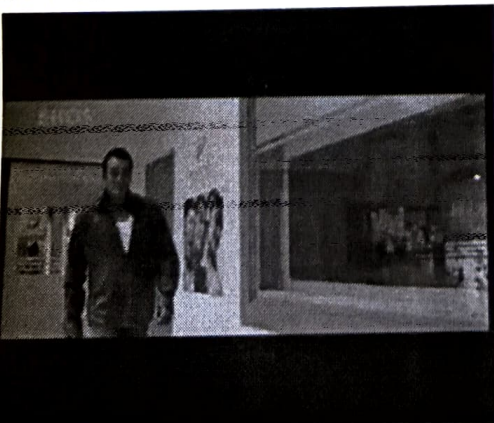

--John Rockefeller

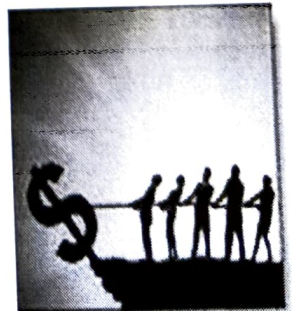

- Treat your employees as you want your best customers to be treated.
- Handle with a smile. Recognize the work. Praise the people.
- There's good in everybody. Boost. Don't knock.
- There is only one way to deal with everybody-"HUMAN WAY".

From this?

- Selecting a prospective employee is like selecting a prospective bride.
- Cost of losing a customer is very high, it costs nearly about 10 million.
- If you can not smile you will find it difficult running a business or likewise is sales.

ENVIRONMENT ISSUE IN TODAY'S CORPORATE

Ms. Vandana, I MBA

Ms. Varsha, I MBA

Ms. Vatsala, I MBA

Mr. Veeresh, I MBA

Mr. Venkatesh, I MBA

Ramaiah Institute of Technology.

Bangalore-560054.

Pollution is the introduction of containment into the natural environment that causes adverse change. With the industrial development in a recent year, humans started using more technology in manufacturing products indeed created more complication to environmental surroundings by polluting Air, Water, and Land. Industries have exploited the environment for their benefit, many trees and animals have been died due to this problem. Environmental pollution does more than simply affect our surroundings, but can directly affect our health in very serious and sometimes even deadly ways. Far too often, companies and corporations are directly responsible for environmental pollution that results in serious and long term illness for those exposed. There are many specific ways that companies recklessly pollute the environment and endanger people's health and lives, all of which should result in legal liability. Some of these type of pollution and their hazardous health effects are listed below.

- **Dust hazards. Dust exposure:**

Especially silica dust can penetrate your lungs and can sometimes cause fatal lung diseases like silicosis and lung cancer as well as a number of other respiratory illnesses such as asthma, emphysema, and chronic obstructive pulmonary disease. This type of toxic dust is a product of many industries, including construction, glass production, dental laboratories foundries, concrete production, and much more. When companies like these do not take necessary precautions to prevent the air pollution of toxic dust which may be breathed in by their employees or bystanders, they can be held liable for their actions and brought to justice for their negligence

- **Mismanagement waste products:**

Mismanagement of waste products can have a number of serious environmental and health effects, especially if they leak into a public water supply or public space. This type of water pollution, in particular, can wreak havoc on your health, especially if u drink polluted water. Chemicals, detergents, food waste products, toxic sludge, and certain metals like lead, can all contribute to water pollution. Drinking water with these waste pollutants can lead to a number of long-term issues, particularly developmental problems in children, reproductive issues, gastrointestinal problems, and neurological disorders.

Try your skills

- How quickly can you find out what is so unusual about this paragraph? It looks so ordinary that you may think that nothing is wrong with it at all and in fact, nothing is wrong with it. But it is unusual . In no book will you find a similar paragraph. In fact, it is hard to fashion such a paragraph. In all of world history, you will not find many such paragraphs. You will not run across a similar paragraph again. Why? If you study it and think about it, you may find out. You must do without coaching . No doubt, if you work at it for long, it will dawn on you. Who knows? Go to work and try your skills. Good luck.
